Salifort Motors Employee Retention

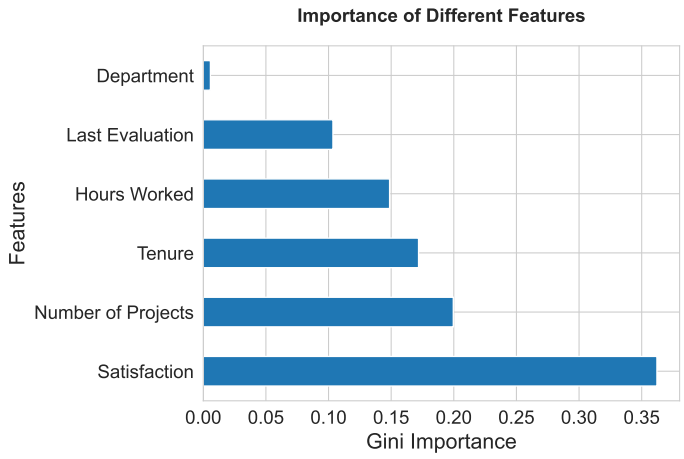

Overview

Salifort Motors has been losing employees at a high rate. This costs the company resources to find and train replacements. Salifort Motors has contracted our data science team to investigate why and propose solutions.

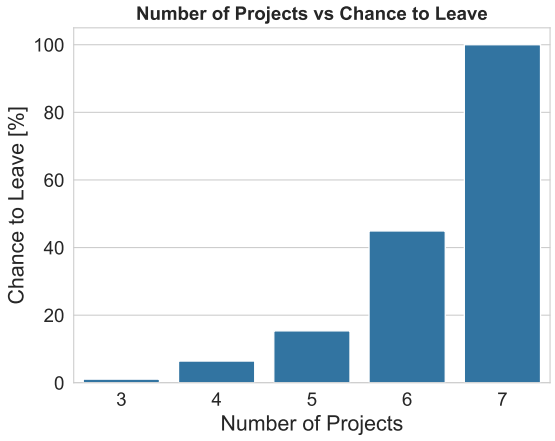

Solutions

- Take satisfaction surveys seriously, and take time to address concerns with disatisfied employees.
- Cap the number of projects that employees can work on, 5 would have the biggest impact.
- Provide more promotion opportunities for employees who have been working for 3 or more years with company.
- Either increase rewards for employees working longer hours, or don't require them to do so.
- Increase vetting procedure for employees who are job-hopping or seem uninterested in company mission.
- Make evaluations less dependent on overtime and number of projects
